1. Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-17, 26, 28-30, drawn to a communications system for communicating over free space, classified in class 370, subclass 310.

II. Claims 18-25, 27, and 31-51, drawn to coupling networks, classified in class 313, subclass 24R.

3. The inventions are distinct, each from the other because: invention I pertains to a communications system for communicating over free space while invention II is drawn to coupling networks.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for

Art Unit: 2616

Group II, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. During a telephone conversation with Mr. Mike Smith on May 29, 2006, no provisional election was made.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
